#### **STUDENT COURSE CHOICES**

Entry onto Level 3 courses includes students achieving 5 x Grade 9-4 or equivalent at GCSE alongside a Grade 5 or above in English and/or Mathematics. Some subjects have specific entry criteria required, which can be found in our prospectus or at <a href="https://sixthform.fulford.york.sch.uk/curriculum-offer">https://sixthform.fulford.york.sch.uk/curriculum-offer</a>

As you will see, the subject choices are in four blocks. If you find that you are unable to choose your ideal combination of subjects as a result of this, please would you make a note of this on the sheet. Unfortunately, although we will attempt to accommodate these requests, the nature of the blocking system means that we are unlikely to be able to do so.

If you are planning to study three A levels, we are also offering students the opportunity to study Core Mathematics in Year 12. This course is equivalent to an AS level qualification and is designed to maintain and develop real life maths skills. These skills are increasingly important in the modern workplace and in higher education and this course is particularly useful for students studying A levels with a significant mathematical content (for example, Science, DT, Psychology and Geography). This will be timetabled for four periods per fortnight in Year 12 only.

If you have any further questions, about either the school or your subject choices, please do not hesitate to contact us.
